

### **Evaluation Criteria for MBG351, MBG352, MBG451 and MBG452 Elective Courses**

At the end of the semester (on a date determined by the research mentor), the student is expected to write a one-page summary report of the research performed during the semester. The report should contain the following sections:

- **Title:** A descriptive title indicating the experimental system and aim of the research.
- **Aim:** A few sentences describing the aim of the work.
- **Experimental work:** Brief descriptions of the different experiments done in the lab, their rationale and results as appropriate.
- **Conclusion:** A conclusion stating what the student has learned about themselves and laboratory research.

### **Evaluation:**

Final grade will be based on the following components:

- Regular attendance and active participation in the laboratory, as well as proper documentation of the conducted work in a laboratory notebook or another suitable recording system (%40)
- Level of engagement, motivation, and responsibility demonstrated throughout the semester (%20)
- Quality and completeness of the final summary report (%40)
